

Kerr Environmental Services Corp.

sustainable ecological restoration and environmental consulting

CONTAMINANT STUDIES

Limited Site Characterization and Remediation Services, Morgan Management, Matthews County, Virginia

Kerr Environmental Services (KES) performed a variety of services as a consequence of previous work by others that had resulted in the Department of Environmental Quality issuing a Pollution Complaint to New Point RV Resort, owned by Morgan Management. KES sampled groundwater from two active drinking water wells on-site to learn whether previous petroleum releases on-site were impacting their sources of potable water. KES also sampled areas of staining within the hydraulic oil and petroleum storage area of the property. Results were presented in a Limited Site Characterization Report and were accepted by the DEQ. KES coordinated the reimbursement process in accordance with the *Virginia Petroleum Storage Tank Fund* (VPSTF), allowing most of the expenses of the owner to be reimbursed by the state for this 18 ton excavation and treatment project.

Kerr Environmental Services Corporation is a Certified Small Business, GSA Contract Holder # GS-10F-0291V and SWaM VA Certified # 653032 that provides services related to National Environmental Policy Act (NEPA) document preparation; watershed inventories; sustainable habitat assessments and design; Low Impact Development design; wetland and stream permitting and mitigation design; remediation investigations; protected species studies; Stormwater Pollution Prevention Plans (SWPPPs) and inspections, and all necessary coordination with regulatory agency personnel.
