ENVIRONMENTAL PLANNING EXPERIENCE

Little Island Parking Lot & Sandpiper Road Improvements, Little Island Park, City of Virginia Beach Parks and Recreation, Land Studio, Virginia Beach, Virginia Kerr Environmental Services worked with Land Studio, PC to receive permits to impact 0.368 acres of inter-dunal vegetated wetlands for the parking lot improvements and 0.087 acres of vegetated wetlands for the widening of Sandpiper Road in Virginia Beach, Virginia. A wetland delineation and primary dune delineation were performed prior to the permit application. The delineation was confirmed by the US Army Corps of Engineers (USACE). The Virginia Department of Environmental Quality (VDEQ) issued a VWP-4 in conjunction with the USACE 12-SPGP-01 for the parking lot improvements. The USACE determined that the proposed road widening satisfies the criteria contained in the Nationwide Permit Number 18. No permit required letters were received from the City and VMRC.
